NEW APPROACH TO STUDYING

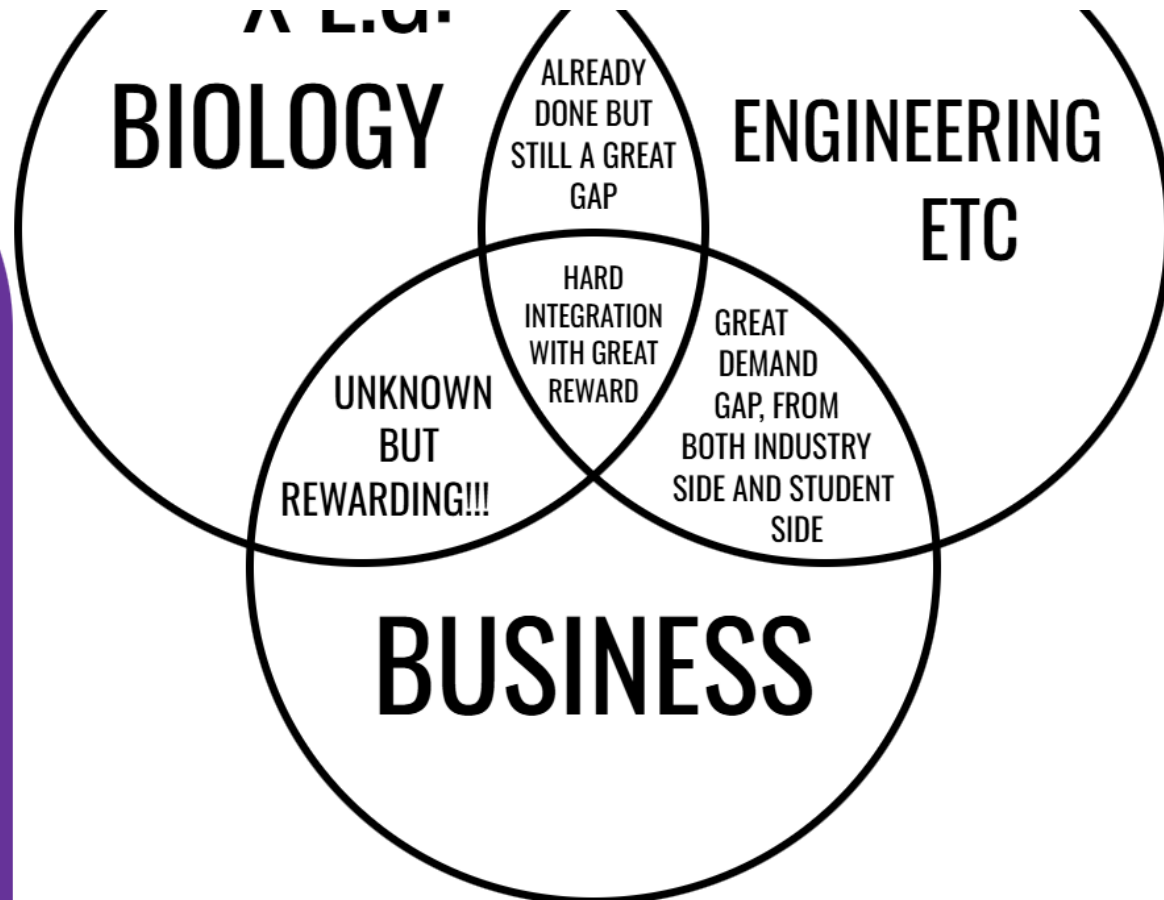

MOHAMMAD MAHDI MAHMOODZADE DARBANDI | MAHMOODZADE.COM

18TH revolution and then now!

- ▶ There is more similarities than you can deny between 18th century's industrial revolution and today's AI
- ▶ then mechanical and physical labor
- ▶ And now even mental tasks!
- ▶ In both of these eras we found a great alternative for a big proportion of human
- ▶ We know that it's going to replace a great deal of what we do but we don't know where to draw the line! There are only two definite items:
 - ▶ 1. change is coming
 - ▶ 2. about the direct shape of it the only certain thing is uncertainty

Revolution is coming hence we need a revolution in education system

Gaps for current academia!

when there is a great gap in market, people need it and this need is obvious to them, hence just by creating a solution and a little bit of marketing you could make money!

but most of the times, people are reluctant or unaware of their needs and it takes a great deal of money/investment or time to have a successful business!

this opportunity is completely demand base Also no powerful competitor exists right now!

remember that if you are not a thief! most of the times, great financial success comes from serving great and more to more people!

Create new Universe | Mohammadmahdi Mahmoodzade darbandi

- ▶ Main problems:
- ▶ This system is not efficient
- ▶ This system doesn't fulfill our needs
- ▶ This system is not designed for new generation (needs like attraction...)
- ▶ This system is not designed for "shift era"s.

Why should we start from iran?

world

- ▶ New needs in economy and industry
- ▶ New generation needs and changes
- ▶ Need of integration in studies due to changes in science and convergence between branches of science

+Special situation of iran

- ▶ Bad economy
- ▶ Concentration of talents in academia
*Iranians are both talented and ultra attracted to academia due to different factors and analysis (references available upon request)
- ▶ Big unanswered gap!

Baby steps of an startup proposal

- ▶ There is a high potential for the startup im going to discuss in every country. But due to special situation of our country there is a higher chance of success.
- ▶ 2 of 5 options discussed in the given voices

▶ P.S1 

▶ P.S2 

▶ P.S3 

Not exactly the
powerpoint guy! But
hope it helped!
